

Influenza Vaccination

Child Form

Dear Parents,

Please provide us with the following information in order to vaccinate your children against influenza for the upcoming season.

Remember: for children younger than 9 years of age, the vaccine requires two injections, given 1 month apart the first year it is given. After that, only one dose is needed in the subsequent years.

Protect your children, yourself and your community!

Our Comprehensive Primary Care program recommends and provides Influenza Vaccination for parents as well. A separate form for the parents is available.

Please fill a separate form for each child!

1. Your child's name:
2. Mailing and/or Billing Address:
3. Date of birth:
4. History of previous influenza vaccination
(please provide details; dates and documents if you have any):
5. History of allergy to eggs: YES or NO

If your answer is yes, please describe the reaction that happened exactly:
